MCCARTIN HOUSE.

PETROLEUM CENTRE, PA.

This popular Hotel, situated

Corner of Main & Washington-Sts.,

Near the Depot, has been refitted and furnished throughout, and the proprietor will spare no pains to make it a

modern Infernal Machine.

An instrument of warfare has recently been invented by an American mechanician, which, it is asserted, will prove more destructive than any weapon heretofore known.

The apparatus consists of a row of twelve guns of 0.70 bore and about forty inches long, mounted on a carriage six feet wide, to be hauled by one horse. The barrels are divergent, so that at three hundred yards distant the twelve bullets sweep a line of about thirty feet, and are fixed at equal distances from each other, except in the middle, where there is a space of ten inches, into which is placed a telescope, and an arrangement for adjusting the gun in taking aim. This contrivance, it is asserted, enables the operator to send a bullet through a ball's eye, at sixteen hundred yards, nine times out of ten. The tubes, or barrels are loaded at the breech and are connected by a rod attached to a crank, one turn of which opens and shuts all the breech pieces and loads the gun. They are made ready for firing by another turn of the crank. The bullet, it is stated, can be fired a distance of two thousand yards with accuracy. At a recent trial, forty-seven out of sixty shots fired, are reported to have struck a target four feet high at a distance of fifteen hundred yards. The invention weighs five hundred pounds, and is intended to be hauled by one horse and worked by two men, one to drive and the other to operate. The loading of the apparatus is so arranged that it can be detached in a moment, when the other part of the machine becomes perfectly useless. The cost of the entire machine, with the horse, is reported to be \$1,000—The infernal, or grape shot shower, the deadly weapon which has attracted so much attention in France from Louis Napoleon, appears to resemble the above American invention.

FIRST-CLASS HOUSE.

W. H. GABLE, Proprietor.

CENTRAL HOUSE,

PETROLEUM CENTRE, PA.

Near Oil Creek & Allegheny River Railway Depot.

A Modern Infernal Machine.

An instrument of warfare has recently been invented by an American mechanician, which, it is asserted, will prove more destructive than any weapon heretofore known. The apparatus consists of a row of twelve guns of 0.70 bore and about forty inches long, mounted on a carriage six feet wide, to be hauled by one horse. The barrels are divergent, so that at three hundred yards distant the twelve bullets sweep a line of about thirty feet, and are fixed at equal distances from each other, except in the middle, where there is a space of ten inches, into which is placed a telescope, and an arrangement for adjusting the gun in taking aim. This contrivance, it is asserted, enables the operator to send a bullet through a ball's eye, at sixteen hundred yards, nine times out of ten. The tubes, or barrels are loaded at the breech and are connected by a rod attached to a crank, one turn of which opens and shuts all the breech pieces and loads the gun. They are made ready for firing by another turn of the crank. The bullet, it is stated, can be fired a distance of two thousand yards with accuracy.

At a recent trial, forty-seven out of sixty shots fired, are reported to have struck a target four feet high at a distance of fifteen hundred yards.

It is reported that a treaty for an offensive and defensive alliance has been privately signed between the Czar and the King of Prussia.

Having added a powerful Steam Engine and three large CYCLES, to our already extensive Manufacturing establishment, are now prepared to do all the necessary work in fitting up, and repairing

ENGINES.
